## DETAILED ACTION

### *Response to Amendment*

The indication of allowable subject matter in the previous office action by Examiner Roberts is regretted and an action on the merit follows.

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 27-29, 31 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by US 6,045,565 to Ellis et al.

Ellis teaches a method for exposing a tissue cutting device 38 located in a distal portion of a lumen of an endoscope catheter 36 for passing through the working channel of an endoscope which comprises:

providing the cutting member with a plurality of radiopaque indicia located at radiologically measurable intervals along a length of the cutting member (col. 4, lines 34-38);

deploying the cutting member; and radiologically determining the length of the cutting member deployed ("visualization of hole depth" col. 4, lines 36-37)

wherein said step of radiologically determining the length uses a radiopaque reference point (inherent in the recited disclosure);

wherein said cutting member is needle knife (col. 4, line 39) and the radio reference point is at the distal end of the catheter (tip of the needle).

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 27-29, 31 and 32 have been considered but are moot in view of the new ground(s) of rejection.
